SHAPING THE FUTURE OF AESTHETICS

Kuraray Noritake Dental Inc.

A century of serving mankind.

CLOSE TO YOUR NEEDS THROUGHOUT EUROPE

Symposia, Technical Trainings, manuals, IFUs, How-To-Use videos, color selection solutions, specialized appointed trainers throughout the European continent, a rich and vast academic network, papers originated from research in vitro and in vivo.

SHAPING THE FUTURE OF AESTHETICS

- Innovator of next generation dental products
- Inventor of adhesive monomer MDP
- Adhesive first-rate standard: CLEARFIL™ and PANAVIA™
- Inventor of KATANA™ Multi-Layered zirconia

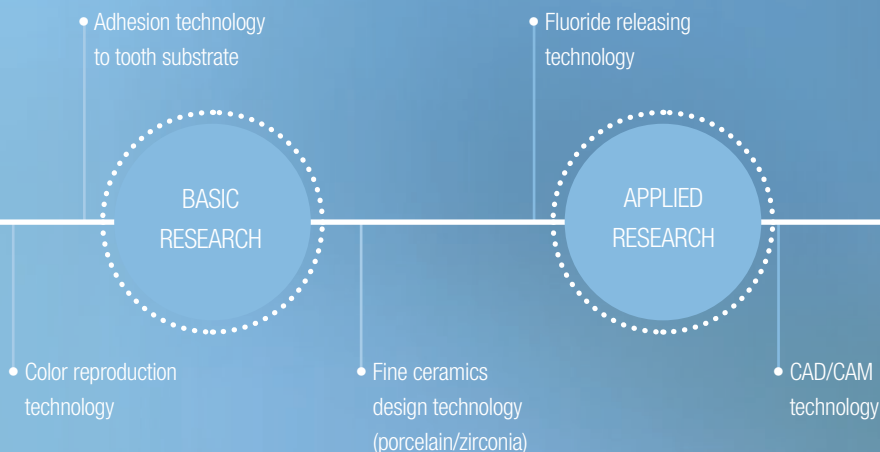

RESEARCH & DEVELOPMENT

Dental Innovation track record of 40 years.

KURARAY

NORITAKE

Dental Inc.

- Kuraray Noritake Dental Inc. is an affiliate of KURARAY CO., LTD. developing dental materials
- The business unit develops dental & medical materials
- 4 strategic bases covering Europe, America and China.
- 1 HQ in Japan

COMPLIMENTARY PRODUCT FAMILIES THAT RESTORE TEETH TO A NEAR NATURAL STATE

CHAIRSIDE

- Bonding: CLEARFIL™
- Cement: PANAVIA™
- Composite Resin: CLEARFIL MAJESTY™

LABSIDE

- Porcelain: CERABIEN™ ZR (CZR)
- Noritake Super Porcelain EX-3
- Zirconia: KATANA™

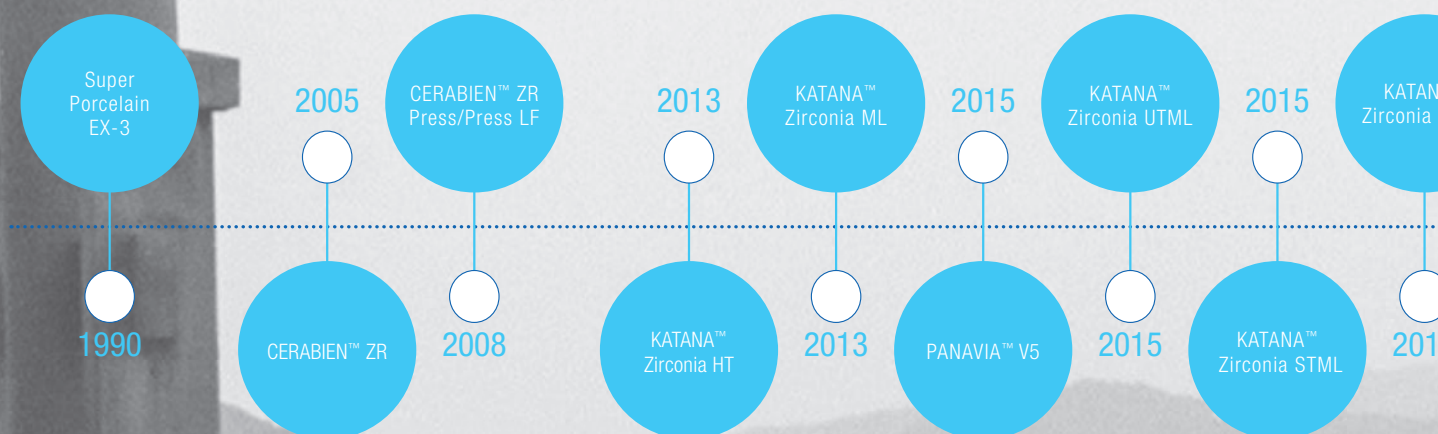

- Surface treatment technology for fine filler
- Dispersion and mixing technology of fine filler
- Fine ceramics production technology
- Easy-to-use powder production technology
- CAD/CAM advancement
- Non-metal alternative materials

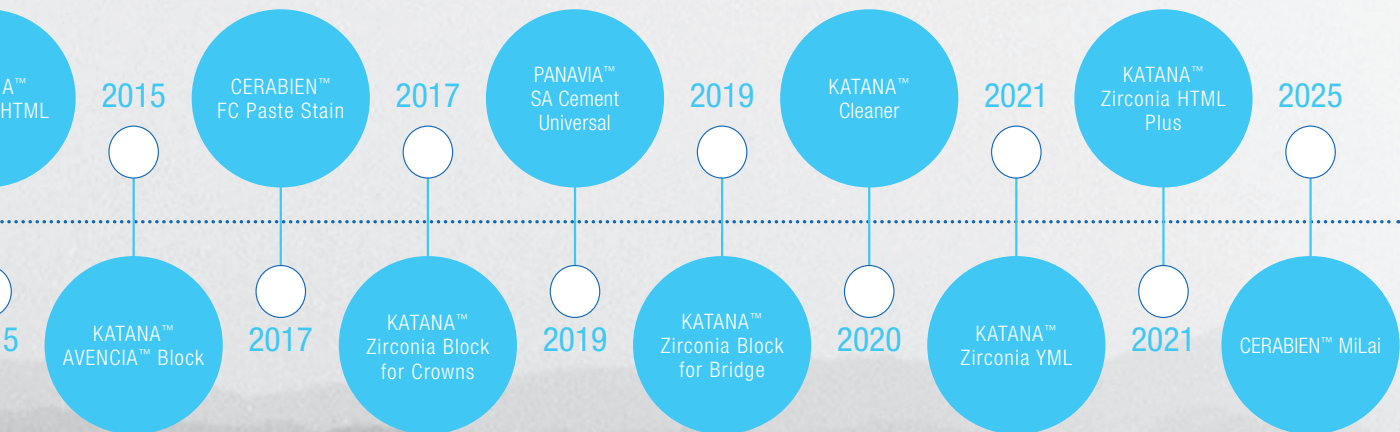

Kuraray Noritake Dental Inc.

On a mission to create less complex dental procedures delivering natural beauty and lasting results.

MILESTONES IN DENTISTRY

The great achievements that changed dentistry in the past 40 years all started within Kuraray and Noritake, Japan.

kuraray

RESEARCH & DEVELOPMENT

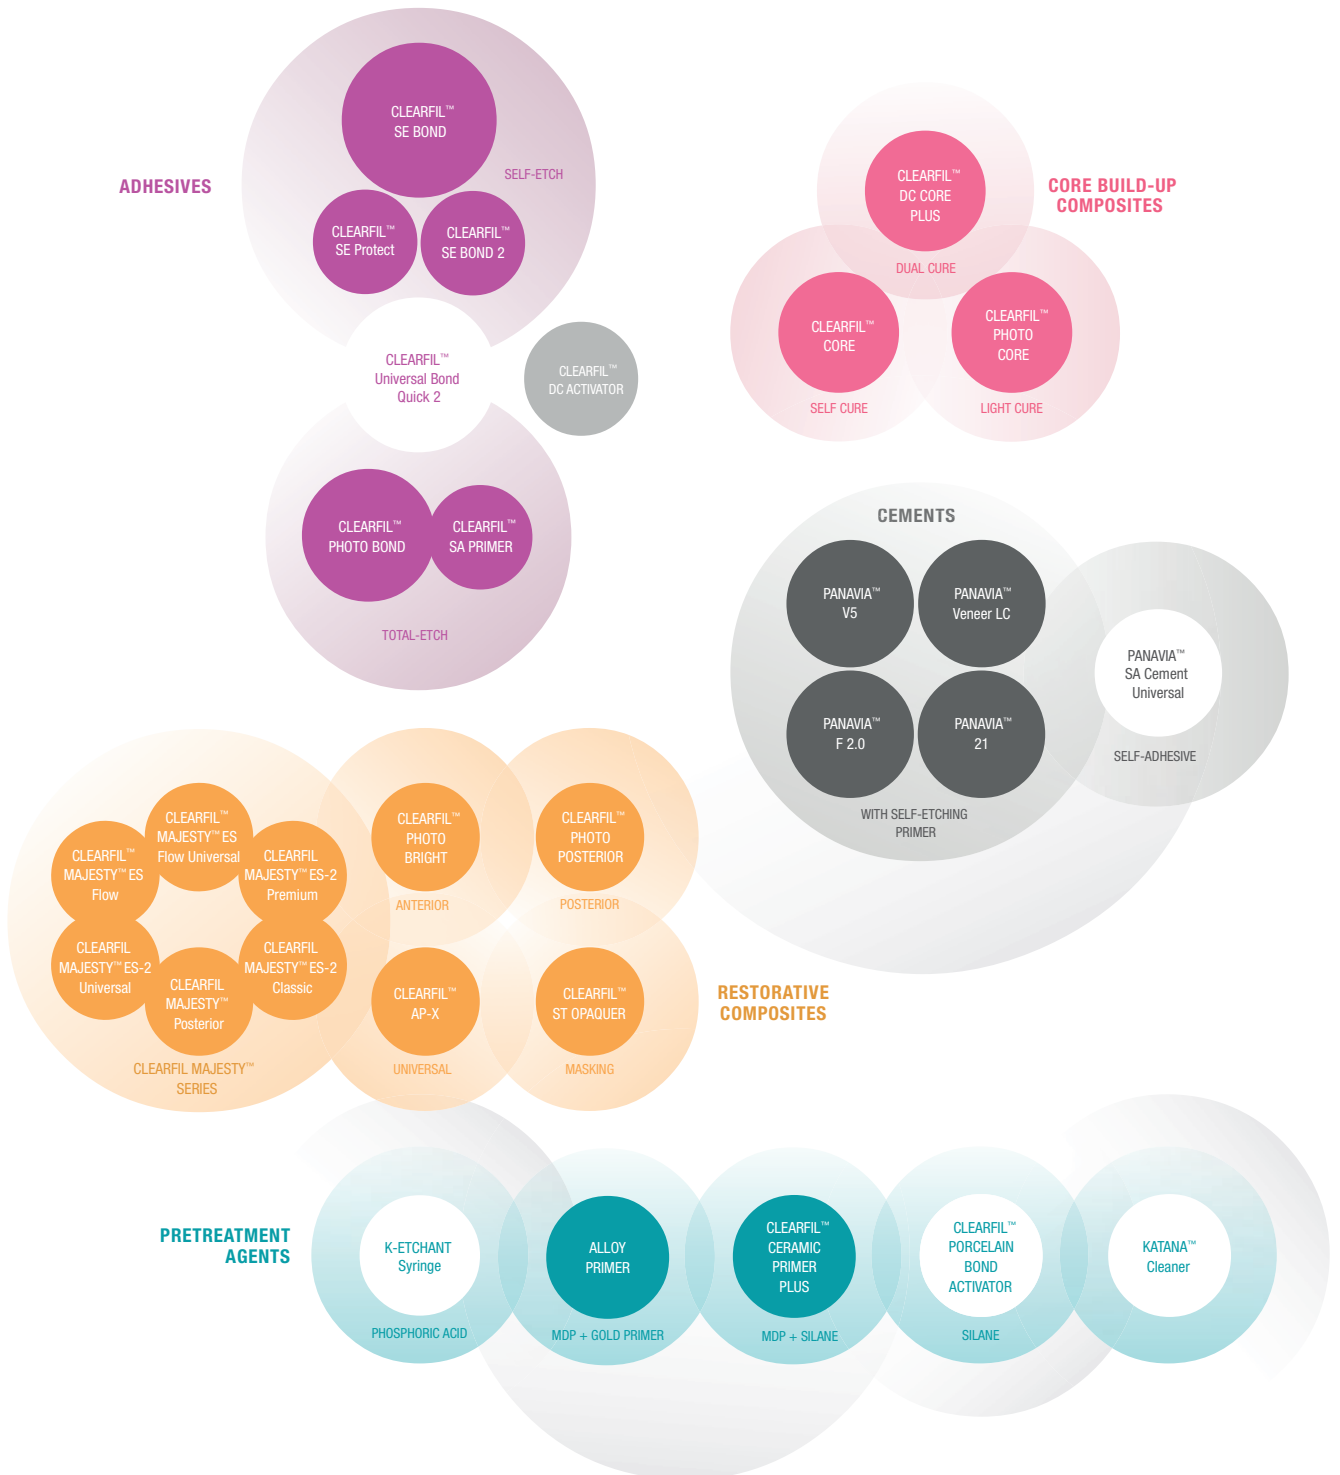

Kuraray began to develop dental products in the 1970s. Today we are recognized as an innovator in the research and development of dental products that simplify everyday dental procedures while delivering first-class, lasting results.

MDP

Back in 1981 we invented MDP, the adhesive monomer which achieves a durable bonding with enamel, dentin, metal and metal oxides.

EVIDENCE-BASED

All our product developments are based on empirical support. And we try to go further, classifying evidence by only the strongest proof coming from clinical cases, practice based research and randomized controlled trials.

HIGH TECH

Kuraray Inc., our mother, develops highly innovative products for many more fields of business besides dentistry. The portfolio ranges from synthetic plastics to fine chemicals and technology used for high-tech processes and finishing.

CRAFTMANSHIP

Kuraray Noritake ensures that the many global dental talents can be consistent in their work by delivering a high standard of quality for our full product range.

KATANA™ Zirconia

KATANA™ Zirconia is the trade mark of high performance zirconia discs for crowns, bridges and frames with highly innovative features.

With the KATANA™ Zirconia discs you have excellent machinability, which avoids dipping during your production process. These zirconias contain advanced ceramic technology, which results in longevity. They show aesthetic translucency, exceptional shrinkage consistency on every distribution point within the disc, as well as high flexural strength.

KATANA™ Zirconia YML Yttria Multi-Layered

Long and complex geometries need ultimate strength, monolithic aesthetics and ultra-high incisal translucency. For a long time, these properties have been mutually exclusive, but they no longer are. With its strong body and highly translucent enamel layer, KATANA™ Zirconia YML offers the properties needed for an unlimited indication range. It is based on a new multi-layer technology featuring newly developed zirconia raw materials with different yttria concentrations integrated into a four-layer colour structure. The result is a chroma, translucency and flexural strength gradation with a seamless structure that makes it extraordinarily easy to produce high-quality, lifelike restorations – including monolithic long-span bridges.

KATANA™ Zirconia UTML Ultra Translucent Multi-Layered

KATANA™ Zirconia UTML is a high translucent disc, which meets the requirements of highest translucency level for anterior crowns and veneers. All layers are highly translucent, whereby the color saturation is reduced in the incisal area. The transparency of the natural enamel is copied and the abutment shade is absorbed.

KATANA™ Zirconia STML Super Translucent Multi-Layered

KATANA™ Zirconia STML is a multi-layered zirconia disc where light is transmitted in the incisal area and blocked in the cervical area. Due to its color and translucency gradient, more opacity in the cervical area and more translucency in the incisal area are achieved.

KATANA™ Zirconia HTML PLUS Highly Translucent Multi-Layered

A high flexural strength is the most important precondition for the production of long-span bridges. With a strength of 1.150 MPa, KATANA™ Zirconia HTML PLUS offers the required property, and it offers it throughout the whole blank. Due to the use of improved raw materials developed inhouse, the material also offers a higher translucency than its predecessor HTML, as well as a brighter, deeper and more vivid colour for a better shade match with natural teeth. The result is a reliable framework or monolithic bridge with a beautiful shape and colour fitting the patient's natural dentition.

KATANA™ Zirconia HIGH-TRANSLUCENT Monochrome High-Performance Zirconia

The KATANA™ Zirconia HT disc is a high-translucent disc, which can be used ideally for highly individualized restorations. Its high aesthetic translucency fulfills all aesthetic demands. The low monoclinic transformation ensures outstanding durability to low temperature degradation. Noritake Zirconia material has superior aesthetic translucency. This is a big advantage to get a perfect result not only in Porcelain-Fused-Zirconia, but also Full-Contour-Zirconia solutions.

- High Strength (1,200MPa)
- High Translucency
- Match with CZR Internal & External Stain and CZR Glaze
- Pre-sintered and stable feature

KATANA™ Zirconia Zirconia Disc for Crowns, Bridges and Frames with Unique, Higher Opacity

With the KATANA™ Zirconia disc you have appropriate hardness for milling, which avoids chipping. This zirconia has advanced ceramic technology and shows aesthetic translucency and exceptional shrinkage consistency on every distribution point within the disc and also high flexural strength (1,200MPa). KATANA™ Zirconia is a stabilized presintered zirconia with low monoclinic transformation and 98.5 mm rounded shape for open architectures.

RECOMMENDATION

PANAVIA™ V5

One Cement. All indications. One prime procedure. PANAVIA™ V5 is the strongest dentin bonding cement we ever developed.

It is our most aesthetic cement and comes in five beautiful shades. There is no better way to durably cement your crowns, single-wing cantilever bridges and veneers. It is also the most reliable way to cement your implant abutments.

CLEARFIL™ CERAMIC PRIMER PLUS

Before you start with PANAVIA™ V5, treat the tooth with our Tooth Primer CLEARFIL™ CERAMIC PRIMER PLUS: a secure adhesion to ceramic, hybrid ceramics, composites and metals is guaranteed with our universal primer which suits all your needs.

ORDER OUR PANAVIA™ V5 STANDARD KIT:

Universal (A2)	Content*	#3601-EU
Clear	Content*	#3602-EU

*Syringe 4.6 ml, Tooth Primer 2 ml, CLEARFIL™ CERAMIC PRIMER PLUS 2 ml, 1 K-ETCHANT Syringe 3 ml, 15 pcs Mixing Tip, 5 pcs Endo Tip, 50 pcs Applicator Brush, Mixing Dish, 20 pcs Needle Tip

CERABIEN™ MiLai

CERABIEN™ MiLai is a set of low-fusing porcelains and internal stains specifically designed for the micro-layering technique.

CERABIEN™ MiLai

CERABIEN™ MiLai is a set of low-fusing porcelains and internal stains specifically designed for the micro-layering technique. The innovative product based on synthetic feldspar enables dental technicians to add the final touch to their zirconia or lithium disilicate restorations in a simple and time-saving procedure – for outstanding aesthetics right from the start.

PORCELAIN SHADES:

ENAMEL SURFACE PORCELAIN

Tx: Add high translucency to the enamel surface

ELT₁: Add brightness to your bleached restorations

LTx: Add high translucency and opalescence to the enamel surface

LT₁: Add standard translucency and opalescence to the enamel surface

Creamy Enamel: Add brightness to the enamel surface

ENAMEL STRUCTURE – INCISAL EFFECT

LT Super Gray: Optimize the incisal area of your middle-aged patients' restorations

LT Royal Blue: Add a strong bluish effect to the incisal area

Aqua Blue 2: Optimize the incisal area of your young patients' restorations

ENAMEL STRUCTURE – CERVICAL EFFECT

CCV-2: Individualize the cervical area

DENTIN STRUCTURE

E₂: Add translucency to the dentin core

TISSUE PORCELAIN

Tissue 1: Individualize large gingival areas

Tissue 4: Add opacity and adjust the value of your gingival areas

Tissue 5: Add opacity and adjust the value for the inner part of the gingival tissue

Tissue 6: Individualize large gingival areas

VALUE CONTROL

Value Liner 1: Increase the value of your lithium disilicate restorations

Value Liner 2: Increase the value and chroma of your lithium disilicate restorations

INTERNAL STAIN SHADES:

Enamel colour

Gray, Incisal Blue 1 and Incisal Blue 2

Dentin colour

Mamelon Orange 2, Cervical 2, A⁺ and B⁺

Translucent effect

CERABIEN™ ZR (CZR) FC PASTE STAIN

The addition of a new paste-type FC Paste Stain (a surface stain) to the CERABIEN™ ZR (CZR) line allows the easy characterization of full-zirconia restorations. FC Paste Stain is available in a total of 27 shades, for the reproduction of a wide variety of shades.

The full complement of blue and gray shades (Light Gray, Dark Gray, Grayish Blue, & Blue) makes the easy reproduction of blue-grayish transparency effects for incisal area possible. Two types of glaze (Glaze & Clear Glaze) make it easier to control the appearance of transparency across the entire crown.

CZR FC Paste Stain Basic Kit

OPTIMIZED FOR FULL-ZIRCONIA RESTORATIONS

Aesthetic full-zirconia restorations can be fabricated efficiently by combining FC Paste Stain with KATANA™ Zirconia YML, UTML, STML or HTML PLUS.*

*FC Paste Stain can be used on the surfaces of restorations where CERABIEN™ ZR (CZR) or CZR PRESS LF is layered on KATANA™ Zirconia. For detailed information, please refer to the CERABIEN™ ZR (CZR) Instructions for Use or the CERABIEN™ ZR (CZR) FC Paste Stain Technical Manual.

CERABIEN™ ZR (CZR)

CZR ("CERABIEN™ ZR") is a porcelain system for making all ceramic crowns in use with zirconia frameworks. Single crown made from CZR with zirconia can be used in the posterior as well as anterior due to its extremely high flexural strength. The combination of CZR and zirconia will give you enhanced aesthetics and fit with maximum strength for an overall superior restoration.

BASIC FULL KIT

Full Kit with Shade Base

BASIC FULL KIT is an excellent kit composed of basic colors for all ceramic crowns and bridges, using Zirconia frameworks. Shade Base porcelains are included instead of Shade Base Stains.

BASIC FULL KIT (630 g)	#104-1740EU
SB (POWDER)	10 g each 18 colors
BODY	10 g each 18 colors
ENAMEL	10 g each 4 colors
TRANSLUCENT	10 g each 5 colors
CERVICAL	10 g each 4 colors
MODIFIER	10 g each 13 colors
ADD-ON	10 g each 2 colors

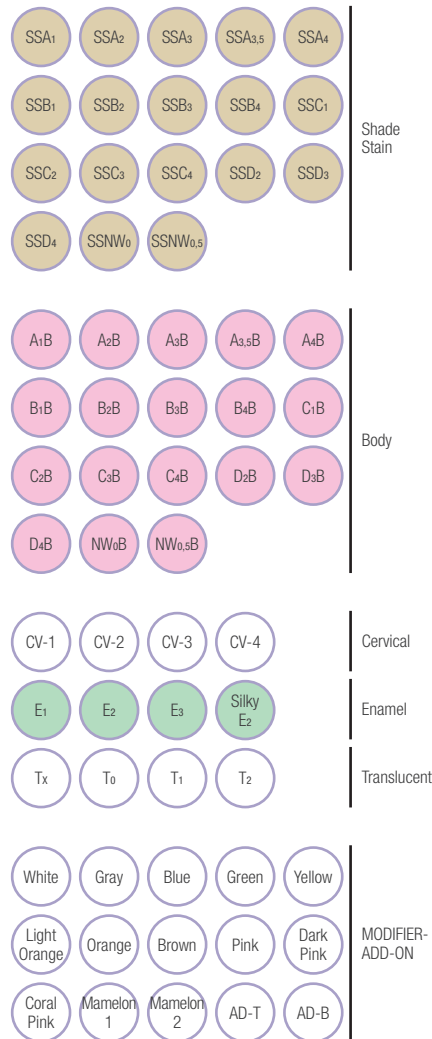

SS BASIC FULL KIT

Full Kit with CZR PRESS LF Shade Base Stain

SS BASIC FULL KIT is an excellent kit composed of basic colors for all ceramic crowns and bridges, using Zirconia frameworks. SS BASIC FULL KIT has the same shade selection as BASIC FULL KIT. Shade Base Stains are included instead of Shade Base porcelains.

SS BASIC FULL KIT (504 g)	#104-1760EU
SS (STAIN)	3 g each 18 colors
BODY	10 g each 18 colors
ENAMEL	10 g each 4 colors
TRANSLUCENT	10 g each 4 colors
CERVICAL	10 g each 4 colors
MODIFIER	10 g each 13 colors
ADD-ON	10 g each 2 colors

MARGIN KIT

Margin Porcelain Assortment

In addition to ordinary usage, MARGIN PORCELAIN can be used to correct a chip in the Zirconia framework. The use of MAGIC FORMER as forming liquid is highly recommended.

MARGIN KIT (190 g)	#104-1770EU
BASIC SHADE:	10 g each 14 colors
SPECIAL COLOR	10 g each 3 colors
DILUTION POWDER (MDL)	10 g each 1 color
RETOUCHING POWDER	10 g each 1 color

ENAMEL / TRANSLUCENT COMPLETE KIT

All Shades of CZR Enamel, Translucent and CCV

COMPLETE KIT (140 g)	#104-1780EU
ENAMEL	10 g each 5 colors
TRANSLUCENT	10 g each 5 colors
CERVICAL	10 g each 4 color

LUSTER CCV KIT

All Luster & CCV Shades including Aqua Blue & Super Gray

LUSTER PORCELAIN reproduces natural enamel in both surface features and color. LUSTER PORCELAIN reproduces the fine surface structure and luster of natural teeth. A unique combination of fine surface particles produces a selective reflection of light that results in the same opalescence seen in natural teeth.

LUSTER CCV KIT (160 g) #104-1790EU

LUSTER CCV	10 g each	15 colors
------------	-----------	-----------

LUSTER COMPLETE KIT

All Shades of CZR Luster

LUSTER PORCELAIN is designed to replicate the exact subtle complexities in shades and texture of natural enamel. It contains extremely fine particles, and it accurately reproduces the natural opalescence of enamel.

LUSTER COMPLETE KIT (190 g) #104-1800EU

LUSTER COMPLETE	3 g each	19 colors
-----------------	----------	-----------

OPACIOUS BODY COMPLETE KIT

Opacious Body Assortment

OPACIOUS BODY can be used to achieve delicate colors and to control translucency.

OB COMPLETE KIT (200 g) #104-1810EU

BASIC SHADE	10 g each	16 colors
SPECIAL COLOR	10 g each	OB White
SPECIAL COLOR	10 g each	OB Orange
SPECIAL COLOR	10 g each	OB Pale Pink
SPECIAL COLOR	10 g each	OBE

EXTERNAL STAIN (ES) KIT

Complete Assortment of External Stain

EXTERNAL STAIN reproduces the great variety of color shades observed on the surface of natural teeth.

EXTERNAL STAIN KIT (73 g) #104-1820EU

EXTERNAL STAIN	3 g each	21 colors
GLAZE	10 g each	1 color
ES LIQUID	10 ml	1 bottle

INTERNAL STAIN (IS) COMPLETE KIT

Complete Assortment of Internal Stain including Fluoro

With INTERNAL STAIN it is possible to replicate many of the most intricate three-dimensional patterns of shade variation found in natural teeth. IS FLUORO is added to the kit.

INTERNAL STAIN KIT (57 g) #104-1840EU

INTERNAL STAIN	3 g each	18 colors
BRIGHT (DILUTION)		1 color
IS LIQUID	10 ml	1 bottle

ESTHETIC WHITE KIT

Assortment of Noritake Esthetic White (EW) Shades with Shade Base

ESTHETIC WHITE KIT is for creating whiter shades rather than NW shades. It is not only pure bleaching shades but also natural and beautiful white shades.

ESTHETIC WHITE KIT (110 g) #104-1870EU

SP (POWDER)	10 g each	2 colors
BODY	10 g each	4 colors
ENAMEL	10 g each	2 colors
LUSTER TRANSLUCENT	10 g each	3 colors

SS ESTHETIC WHITE KIT

Assortment of Noritake Esthetic White (EW) Shades with CZR PRESS Shade Base Stain

SS ESTHETIC WHITE KIT is for creating whiter shades than NW shades. It is not only pure bleaching shades but also natural and beautiful white shades.

SS ESTHETIC WHITE KIT (96 g)	#104-1880EU	
SS (STAIN)	3 g each	2 colors
BODY	3 g each	4 colors
ENAMEL	3 g each	2 colors
LUSTER TRANSLUCENT	3 g each	3 colors

TISSUE KIT

Assortment of 7 Gingival Colors

TISSUE KIT is a complete kit of 7 Noritake Tissue Colors. All colors are very useful for implant work.

TISSUE KIT (70 g)	#104-1890EU	
Tissue	10 g each	TISSUE 1-7

OPAQUE SHADES

Five opaque shades that deliver high opacity, resulting in even more lifelike restorations. The opaque shades make it even easier to adjust zirconia colours, especially when building-up tissue porcelain on a framework as well as masking metal or discoloured abutments.

OPAQUE SHADES		
Opaque White	10 g each	104-5931EU
Opaque Light	10 g each	104-5941EU

VALUE SHADE BODY KIT

All 26 Shades of Value Shade Body Assortment

VALUE SHADE BODY KIT is an ideal assortment of basic shades.

VALUE SHADE BODY KIT (260 g)	#104-5500EU	
VALUE SHADE	10 g each	26 colors

VALUE SHADE OPACIOUS BODY KIT

All 26 Shades of Value Shade Opacious Body Assortment

OPACIOUS BODY can be used to achieve delicate colors and to control translucency.

VALUE SHADE OPACIOUS BODY KIT (260 g)	#104-5510EU	
VALUE SHADE OPACIOUS	10 g each	26 colors

RELATED MATERIALS

CZR FL GLAZE (INCLUDING FLUORESCENCE) CZR VC GLAZE (FOR VALUE CONTROL)

These glaze powders are recommended to achieve aesthetic glossiness for full-contour restorations.

CZR FL AND VC GLAZE		
CZR ES FL GLAZE	10 g each	104-5571EU
CZR ES VC GLAZE	10 g each	104-5581EU

CZR PRESS LF

CZR PRESS LF is a low-fusing porcelain designed to build up the enamel layer directly over a CZR PRESS ingot - without requiring a zirconia framework. It provides excellent compatibility, strength for daily clinical use, and high stability through repeated firings. Well-suited for anterior single crowns, laminate veneers, inlays, and onlays, CZR PRESS LF combines versatility with outstanding aesthetics.

LF LUSTER CCV KIT

Luster & CCV Shades including Aqua Blue & Super Gray

LF LUSTER/CCV KIT is an assortment of all available CZR PRESS LF LUSTER and CCV porcelains. LUSTER can produce beautiful surface textures with natural opalescence. CCV is very effective when applying on cervical area.

CZR PRESS LF LUSTER CCV KIT (160 g) #107-0150EU

Noritake Super Porcelain EX-3

DENTAL PORCELAIN for Metal Framework Restorations.

The fabrication procedures for Noritake Super Porcelain EX-3 are remarkably easy. Its outstanding features are made possible because of its very fine particle size. Noritake Super Porcelain EX-3 is superior to other dental porcelains because its coefficient of thermal expansion (CTE) remains stable during repeated bakings. Therefore, when making a long-span bridge, each unit may be precisely customized with repeated baking of the entire span with minimal risk of cracking. It is compatible with precious, semi-precious, non-precious and silverfree alloys for metal-ceramic protheses. Its fluorescence is ideal and it is highly resistant to silver-induced greening. This combination of features makes Noritake Super Porcelain EX-3 an ideal choice for porcelain restorations.

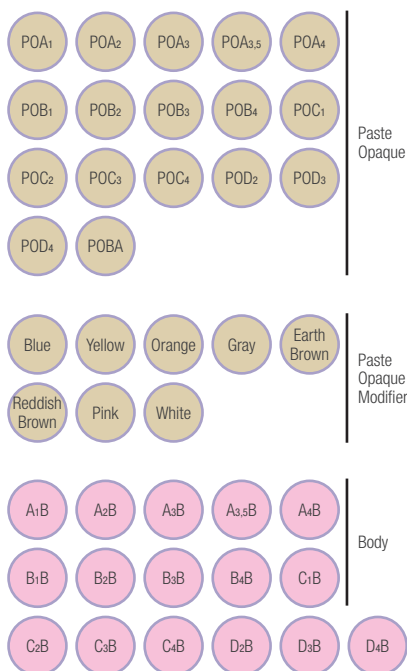

FULL KIT PST

40 Shades of Noritake Super Porcelain EX-3 and 25 Shades of Paste Opaque

nCOLOR PASTE OPAQUE BASIC KIT

Basic Assortment of Paste Opaque (nCOLOR)

nCOLOR PASTE OPAQUE BASIC KIT is a paste-type opaque kit that is extremely easy to use. Even a novice can completely mask the metal with a thin even coat. It is highly effective at masking the metal line at the margin. Paste-opaque can mask the metal color with a thinner coat than that required for powder opaque. This thinner coat provides more space for subsequent porcelain layers, permitting a more natural appearance.

OPACIOUS BODY COMPLETE KIT

Opacious Body Assortment including OB Pale Pink

Noritake Super Porcelain EX-3 OPACIOUS BODY PORCELAIN is formulated with an intermediate degree of translucency, between that of opaque and body porcelain. It is useful in a variety of situations, for example, in the cervical areas of pontics where thick body porcelain becomes too translucent. OPACIOUS BODY COMPLETE KIT includes OB PALE PINK as new line-ups.

O. B. COMPLETE KIT (200 g)	#102-0200EU	
BASIC SHADE	10 g each	17 colors
OB MODIFIER	10 g each	3 colors

EXTERNAL STAIN (ES) KIT

Complete Assortment of External Stain

SUPER PORCELAIN EXTERNAL STAIN is designed to be used with the Noritake Super Porcelain EX-3 product line. Staining can reproduce the complex color shades observed in natural teeth. Noritake Super Porcelain EX-3 EXTERNAL STAIN possesses thermal expansion properties identical to Noritake Super Porcelain EX-3. Consequently, when used in combination, there is minimal risk of separation even after long term intra-oral function.

EXTERNAL STAIN KIT (73 g)	#102-0220EU	
EXTERNAL STAIN	3 g each	22 colors
GLAZE	10 g each	1 bottle
ES LIQUID	10 ml	1 bottle

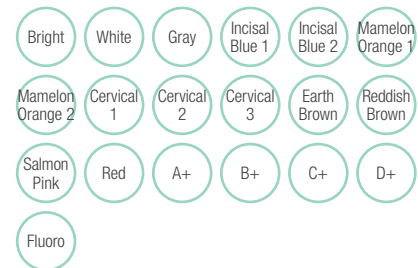

INTERNAL STAIN (IS)

COMPLETE KIT

Complete Assortment of Internal Stain including Fluoro

Developed in collaboration with the renowned ceramist Mr. Aoshima, INTERNAL STAIN makes the innovative "Internal Staining Technique" practical for everyday laboratory use. The internal staining technique is the best method to replicate many of the most intricate patterns of shade variation found in natural teeth. IS FLUORO is added to the kit.

INTERNAL STAIN COMPLETE KIT (57 g)	#102-0240EU	
INTERNAL STAIN	3 g each	19 colors
BRIGHT (DILUTION)	3 g each	1 bottle
IS LIQUID	10 ml	1 bottle

TISSUE KIT

Assortment of 7 Tissue Colors

TISSUE KIT is a complete kit of 7 Noritake Tissue colors. All colors are very useful for implant work.

TISSUE KIT (70 g)	#102-0280EU	
TISSUE	10 g each	TISSUE 1-7

ADDMATE KIT

Assortment of Repair Porcelains

ADDMATE PORCELAIN is designed for the modification of porcelain-fused-to-metal restorations in the final stages of completion. It requires a firing temperature of only 660 - 700 °C (220 - 1292 °F). It is very well suited for minor morphological corrections and repairing of minor defects. Additionally, it may also be used for the delicate task of modifying a post-soldered fixed partial denture. ADDMATE is not compatible with porcelains designed to be used with titanium-based alloys. However, ADDMATE is highly recommended for latter-stage modifications of any other porcelain whose CTE lies between 12.0 and 13.0 x 10⁻⁶ °C.

ADDMATE KIT	#102-0250EU
LIGHT OPAQUE	10 g each
DARK OPAQUE	10 g each
LIGHT BODY	10 g each
DARK BODY	10 g each
ENAMEL	10 g each
TRANSLUCENT	10 g each
ADDMATE FORMING LIQUID	1 bottle

SPEED ENAMEL

Developed for 2 Layers Build-up Technique

Noritake Super Porcelain EX-3 Speed Enamel is a new item especially developed for 2 layers build-up technique. Compared with the conventional enamel, Speed Enamel has a beautiful opalescent effect. The aesthetic restoration can be obtained easily with a simple application method. It is suitable for not only aesthetic work but also mass-production. Start your simple and beautiful work with Speed Enamel NOW!

SHADE GUIDE

The Noritake SHADE GUIDE has been specifically designed to match precisely with Noritake Porcelains. It will make shade taking from natural teeth very easy.

SHADE GUIDE

NORITAKE SHADE GUIDE 211-1189EU

ESTHETIC WHITE SHADE GUIDE

ESTHETIC WHITE SHADE GUIDE is a shade guide for new bleaching shades. Esthetic white shades are even whiter than NW shades.

ESTHETIC WHITE SHADE GUIDE 211-1199EU

PEARL SURFACE

PEARL SURFACE is a porcelain polishing material for use after the final recontouring. It adds a natural luster to the surface without altering the subtleties in the texture. It is also suitable for polishing hard resin and denture-base acrylic resin.

PEARL SURFACE

PEARL SURFACE Z	20 g	#221-0769EU
-----------------	------	-------------

MEISTER FINISH

Minor adjustments on porcelain margins. Grooves in occlusal metal. Inside surface of PFMs and full cast metal crowns. The surface of the access hole of an implant supported crown. The finishing line of a denture framework. The tooth-side-surface of rests.

NORITAKE MAGIC

MAGIC FORMER is a dry-and-set type Margin Porcelain forming liquid. It has strong adhesive properties with opaque porcelain and becomes quite hard when it is dried. It is easy to remove the coping from the die without disturbing the margin porcelain. MAGIC SEPARATOR is a pen-type porcelain separator. It is used to separate porcelain from the model material in margin porcelain area, on the gingival surface of pontics and in adjacent contact area.
