# BE INSPIRED...

**The KATANA™ Revolution with CEREC:  
Better, Faster, Stronger**

Darin O'Bryan D.D.S.

## SEMINAR SCHEDULE

WED. | 13.03.

10:30 - 11:30

13:00 - 14:00

**HALLE 11.3 / STAND D010**

**IDS  
2019**

## ...BY OUR SPECIAL LECTURE

### Darin O'Bryan D.D.S.

Dr. Darin O'Bryan is faculty with CERECdoctors.com at the Scottsdale Center for Dentistry. He is also a basic and advanced trainer for Patterson, a Beta tester for Sirona and product tester for dental manufacturers. He is an internationally published author on digital and CAD/CAM dentistry and has mentored hundreds of dentists on how to integrate technology into their office.

In this presentation you will find out about the newest high strength esthetic material available for chair side milling, the KATANA™ Zirconia Block STML. Find out what features set this material apart from all other current materials available for same day restorations. Learn what cases KATANA™ is ideal for and the best bonding/cementation protocols to use to get maximum strength and longevity. You will also learn about the latest advances with the KATANA™ STML material, including the upcoming bridge block and faster firing cycle for chair side restorations.
